PROFESSIONAL SUMMARY

Cyber Security undergraduate with a strong interest in IoT, Embedded Systems, Artificial Intelligence, and Industry 4.0 technologies. Hands-on experience developing AI-enabled applications through academic projects and internship experience. Passionate about building intelligent, secure, and scalable solutions while continuously learning emerging technologies and applying them to solve real-world engineering challenges.

TECHNICAL EXPERTISE

AI & ML: Machine Learning, Computer Vision, Data Analysis

Cybersecurity: Network Security, Cryptography, Secure Systems

Development: Flask, HTML, CSS, JavaScript, SQL, Git, GitHub, VS Code, Arduino IDE, IoT Fundamentals

EDUCATION

RNS Institute of Technology, Bengaluru BE in CSE (Cyber Security) | 2023 – Present | CGPA: 7.8 / 10.0

Deeksha College, Bengaluru Pre-University | 2021 – 2023 | 89.7%

Sudarshan Vidya Mandir, Bengaluru Schooling | 2009 – 2021 | 90.6%

PROFESSIONAL EXPERIENCE

Web Development Intern – Valtech | Aug 2025 – Sep 2025

- Developed responsive web applications using HTML, CSS, and JavaScript.
- Integrated frontend applications with H2 Database for efficient data management.
- Collaborated in an Agile Scrum environment through daily stand-ups and sprint planning.
- Gained practical experience in software development lifecycle and team-based project execution.

Volunteer → Leader – U and I Trust | Jun 2025 – Present

- Started as a volunteer teaching foundational literacy to children.
- Progressed to a leadership role, coordinating volunteers and supporting program execution.
- Contributed to educational and community development initiatives.

PROJECTS

SilentSOS – AI-Powered Public Distress Detection

- Developed an AI-assisted public safety solution using computer vision for real-time distress detection.
- Applied machine learning concepts to analyze visual data for detecting emergency situations.
- Explored intelligent event detection techniques to improve public safety and emergency response.

Adaptive Cyber Defense System

- Developing an AI-assisted platform to simulate cyber-attack propagation and assess network security risks.
- Applying machine learning techniques to analyze system behavior and recommend adaptive defense strategies.
- Designing an intelligent decision-support system for automated risk assessment and security analysis.

Deskhop – Secure Workspace Booking System

- Developed a secure hybrid workspace booking application using Flask, SQL, and role-based authentication.
- Designed backend modules for resource allocation, booking management, and database-driven workflows.
- Implemented scalable and secure application architecture to improve operational efficiency and user management.

Smart Shopping Cart (Ongoing): An automated retail billing system to improve shopping efficiency.

CERTIFICATIONS

Coursera: Front-End Development (Meta), IBM Cybersecurity Analyst, Security Governance & Compliance

NPTL : Cryptography and Network Security (Elite Certification), IIT Kharagpur, 2026.
