SUMMARY

Cyber Security undergraduate with hands-on experience in web development, AI-enabled applications, and security-focused software projects. Interested in IoT, Embedded Systems, AI, and Industry 4.0. Currently a Software Development Intern building components of an enterprise smart security platform.

SKILLS

Languages & Web: HTML, CSS, JavaScript, TypeScript, SQL
Frameworks & Libraries: React, Flask, FastAPI
Streaming & Security Systems: RTSP, FFmpeg, HLS, NVR, IP Cameras, PoE Networking
AI & ML: Machine Learning, Computer Vision, Data Analysis
Cybersecurity: Network Security, Cryptography, Secure Systems
Tools & Practices: Git, GitHub, VS Code, Arduino IDE, H2 Database, IoT Fundamentals, Agile Scrum

EXPERIENCE

Software Development Intern | Government Tool Room & Training Centre (GTTC), Bengaluru | Aug 2026 – Present

- Contributing to an enterprise smart security platform integrating surveillance and physical security systems
- Developing software modules using React, TypeScript, and FastAPI
- Implemented live IP-camera streaming using RTSP, FFmpeg, and HLS
- Worked on NVR, IP camera, and PoE networking setups, resolving configuration and streaming issues through hardware–software integration

Web Development Intern | Valtech | Aug 2025 – Sep 2025

- Developed responsive web applications using HTML, CSS, and JavaScript
- Integrated frontend applications with an H2 Database for data management
- Collaborated in an Agile Scrum environment through daily stand-ups and sprint planning

Volunteer to Leader | U and I Trust | Jun 2025 – Present

- Began by teaching foundational literacy to children, then advanced to a leadership role
- Coordinate volunteers and support program execution

PROJECTS

SilentSOS – AI-Powered Public Distress Detection

- Developed an AI-assisted public safety solution using computer vision for real-time distress detection
- Applied machine learning concepts to analyze visual data and detect emergency situations

Adaptive Cyber Defense System (In Progress)

- Developing an AI-assisted platform to simulate cyber-attack propagation and assess network security risks
- Applying machine learning to analyze system behavior and recommend adaptive defense strategies

Deskhop – Secure Workspace Booking System

- Developed a secure hybrid workspace booking application using Flask, SQL, and role-based authentication
- Designed backend modules for resource allocation, booking management, and database-driven workflows

Smart Shopping Cart (Ongoing) – Automated retail billing system to improve shopping efficiency

EDUCATION

BE in CSE (Cyber Security) | RNS Institute of Technology, Bengaluru | 2023 – Present | CGPA: 7.8/10.0

Pre-University | Deeksha College, Bengaluru | 2021 – 2023 | 89.7%

CERTIFICATIONS

- NPTEL: Cryptography and Network Security (Elite Certification), IIT Kharagpur, 2026
- Coursera: Front-End Development (Meta); IBM Cybersecurity Analyst; Security Governance & Compliance
